-

Professional Experience

Software Engineer, JUN 2015 to Present – FIDELITY INVESTMENTS, Westlake, TX

Provide analytical problem-solving through object oriented programming concepts for the fourth largest mutual fund and financial services group in the world. Developing and customizing software for a diverse client base, both internal and external.

- Lead developer and scrum master on several projects and initiatives, designing solutions, and guiding other developers in their implementation
 - Design, develop, and test enhancements and new functionality (Java, Spring, Angular, SQL)
 - Provide support by investigating application issues and developing data fixes to correct issues (PL/SQL)
 - Developed and maintained software automation suite (Sahi/Selenium, Java)
 - Developed and customized new routing strategies for Fidelity's Next Generation Call Center from requirements gathering through successful deployment (Javascript)
 - Designed and developed custom software tools to increase the productivity of the Next Generation Call Center team and their customers (C#, .NET)
 - Contributed to the quote auditing and reporting tool that saved the firm over \$1 million in stock quote fees (Java, Spring)
-
